

CIRPASS-2 launches circular-data.org, a hub for the Digital Product Passport Community

The EU-funded CIRPASS-2 project has launched the CircularData ecosystem, a networking tool for organisations involved in the Digital Circular Economy and in the development of the Digital Product Passport (DPPs). CircularData, hosted on the Clusterly platform by project partner EKODENGE, is a one-stop hub to connect, collaborate and co-create. This free, online networking space enables organisations to exchange knowledge, share DPP use cases, services, and innovations.

CircularData is not just another platform - it is a living ecosystem equipped with powerful tools to:

- Connect with other members of the DPP community through direct messaging and matchmaking
- Stay up to date with cluster-specific news feeds
- Discover and showcase real DPP pilots, services, and business models
- Enhance the organisations' visibility in the evolving Digital Circular Economy

Connect, collaborate, and showcase your work in a growing Digital Product Passport (DPP) community.

Designed to make collaboration simple, CircularData brings organisations together around shared goals and sustainable use cases by connecting them into clusters. After registering, users can create or join an organisation, and then set up or join clusters, each with a dedicated space to share projects, promote services, and highlight opportunities across the ecosystem, helping to build partnerships and drive collective progress.

Explore circular-data.org and join the community

Visit the CIRPASS-2 project website: www.cirpass2.eu for the latest news and events.
